DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Szumer (US Pat. No. 6,418,634).

3. Szumer discloses the invention substantially as claimed where: **10** illustrates a box level with vial openings **20, 22** including vials secured within; **26** are handholds and hang openings are included within endpieces **16**. The handholds have liners of a rubber material that form rims and an application plane as claimed (see FIG 2). However, Szumer does not disclose the hang liners as claimed. This is merely duplicating the known liners of Szumer for a multiplied effect and does not render the claimed device patentable [see *St. Regis Paper Co. v. Bemis Co., Inc.*, 193 USPQ 8, 11 (7th Cir. 1977)]. Using additional liners in conjunction with the openings of Szumer will provide additional contact points to the application plane. Therefore, it would have been obvious at the time the invention was made to use the liners as taught by Szumer through *any* additional orifice (such as the hang members at **16**) for the purpose of providing additional, raised surface areas on the application plane.

Allowable Subject Matter

4. Claims 8-14 are allowed. The prior art of record does not disclose or suggest the detailed flange structure as claimed.

Conclusion

5. Applicant's arguments filed 6 OCT 2004 regarding claims 1-8 have been fully considered but they are not persuasive. In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper speculation, unfounded assumptions or hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971). In the instant application, it was within the level of ordinary skill in the art at the time the claimed invention was made to use further raised rubber inserts to increase the contact surface area of the high-friction, non-slip interface taught by Szumer.
